HINTS for Lab 2:

1. You need to be clarified on two example programs that I posted on the "Lab tutorials" section on the blackboard. I will discuss it on the (03-24-22) class lecture as well.
2. You do not need to convert following lines on ARMSim, which are marked as red line:

```cpp
#include <iostream>
using namespace std;
int main()
{
    int i,sum=0;
    for (i = 1; i <= 10; i++)
    {
        sum=sum+i;
    }
    cout << "The sum of first 10 natural numbers: "<<sum << endl;
}
```

3. You are welcome to set up zoom meeting with me if you need further clarifications. I am available most of the time.
   or
   If you live near ENMU campus you can come to the campus for the face-face meeting (while maintaining COVID regulation and permission from ENMU).
